

New for 2013!

Prisoner Transport Lift System

Mac's Lift Gate Inc. is proud to work with Braun Northwest Inc.

Braun Northwest brings years of experience of building prisoner transport vehicles for maximum control, maneuverability and the protection of the individuals inside. We are committed to keeping the public, inmates and your personnel safe. These vehicles are built with prisoner transport in mind. Guided by experienced corrections officers, our engineers have considered every detail to give you a vehicle that is durable, easy to maintain, and safer to operate while transporting prisoners.

Braun Northwest prisoner transport vehicles are designed exclusively for that purpose, not just a modified stock vehicle.

The Mac's Prisoner Transport Lift System is designed to stow underneath the vehicle. There is no part of the lift inside the vehicle for a prisoner to access. The lift has a 750 lbs. lifting weight capacity. Don't strain your back ... Go see Mac!
